

NEVER STOP LEARNING

Hi Jules,

The site looks good and I think a great way for fresh amateurs to looking at upgrading their license to have a play and prepare for the exam! Good job, well done.

G,Day

I have just recently become a member of the local radio club at Gosford. and i have been trying to learn on my own. but its very complex stuff.

i just wanted to thankyou for this site/service because this has made it alot easier for me to understand. im very new to radio and while i dont have an actual radio i do have a digital version ready to go when i get my license. I'm planning on attending a Saturday meet soon but i have been shy about it because i haven't learned the material

So thankyou very much for the material. it really is well done and i am a huge fan of it.

Hi Jules - if the question side diagram looked distorted then yes, that's how it looks to me. Cheers

We want to make it accurate. I looked at you next email and not sure if the drawing came out as you intended,

Hi Jules,

I just wanted to say thank you for all the resources you've created on studying for the advanced amateur radio course. I'm almost finished my electrical engineering degree and figured I might as well get my amateur radio licence. I've really enjoyed working through it so far. Anyway, cheers!

NEVER STOP LEARNING

Hi Jules,

Thanks for all your help in this process. I'll let you know when I hear back from ACMA and get my call sign.

Kind regards,

Hi Jules,

Just a quick thanks for having all the amateur radio info on your site.

I was able to use it to study for my amateur radio license in conjunction with a couple of books i purchased from WIA.

I have passed my license and cant wait to get on the air.

I think we may have met in the past, i was a volunteer at Joes Repair Cafe, in Werribee and we may have spoken.

Anyway thanks again for your site and the info you have shared on it.

Regards

Hello Jules,

Just followed a link whilst using Google.

I have only looked at a few of your pages and have found the information very interesting.....

Hi Jules,

Wow! A lot of work and effort certainly has gone into this one, looks good and I would say very useful. I have passed it on to to our training officers.

Thank you for including us in your update notification and keep up the good work.....
